More than half a decade ago, I was sitting in these classrooms taking notes.

Today, I got to come back and share our sustainability work and more importantly, exchange ideas with some incredibly sharp students, professors, and sustainability enthusiasts.

Surreal moment. Even better conversations.

What stood out most? The curiosity. The tough questions. The fresh perspectives. They push you to think deeper about what you're building and why it matters.

Moments like these remind you how far you've come... and how much more there is to build.

Grateful for the journey.

Thank you [PSG Institute of Management](#) for the great event.
